

cold **POOL?**

affordable **HEAT!**

A tropical resort pool scene with palm trees, lounge chairs, and umbrellas. The pool is in the foreground, reflecting the sky and surrounding elements. The background shows a clear blue sky and a glimpse of the ocean.

SYMBIONT
GEO-THERMAL POOL/SPA HEATERS

economical

- greatest return on investment, pays for itself from savings vs. gas
- reduces heating costs up to 85% compared to gas
- uses minimal electricity to transfer heat
- borrow's nature's free heat

reliable

- heats like gas
- unlike solar, needs no sun
- unlike air source, not affected by air temperature
- perfect pool temperature year round, can cool in summer

durable

- longest serviceable life expectancy of all heating options
- simple process means dependability
- corrosion resistant against harsh environments
- easy to maintain

green-responsible

- environmentally friendly alternative to gas
- heat transfer, not heat generation
- minimal carbon footprint
- no toxic or noxious emissions

intelligent
